

RJEŠENJA

matematika.

otroci.org

1. Izračunaj i provjeri množenjem!

$$25 : 7 = 3, \text{ ost. } 4, \text{ jer } 7 \cdot 3 + 4 = 25$$

$$37 : 5 = 7, \text{ ost. } 2, \text{ jer } 7 \cdot 5 + 2 = 37$$

$$19 : 9 = 2, \text{ ost. } 1, \text{ jer } 2 \cdot 9 + 1 = 19$$

$$73 : 8 = 9, \text{ ost. } 1, \text{ jer } 9 \cdot 8 + 1 = 73$$

$$65 : 7 = 9, \text{ ost. } 2, \text{ jer } 9 \cdot 7 + 2 = 65$$

$$65 : 8 = 8, \text{ ost. } 1, \text{ jer } 8 \cdot 8 + 1 = 65$$

2. Izračunaj!

$$8 \cdot 3 + 6 \cdot 6 = 24 + 36 = 60 \qquad 4 \cdot 3 + 8 \cdot 9 = 12 + 72 = 84$$

$$2 \cdot 7 + 5 \cdot 5 = 14 + 25 = 39 \qquad 7 \cdot 3 - 1 \cdot 0 = 21 - 0 = 21$$

$$8 \cdot 3 + 9 \cdot 5 = 24 + 45 = 69 \qquad 8 \cdot 9 - 4 \cdot 6 = 72 - 24 = 48$$

3. Izračunaj račune!

$$498 + 197 = 695 \qquad 263 + 259 = 522$$

$$198 + 380 = 578 \qquad 382 - 167 = 215$$

$$873 - 237 = 636 \qquad 619 - 110 = 509$$

$$681 - 158 = 523 \qquad 727 - 315 = 412$$
