

1. Sastavi račune iz brojeva:

$$3, 8, 24 \quad \boxed{3} \cdot \boxed{8} = \boxed{24} \quad \boxed{8} \cdot \boxed{3} = \boxed{24}$$

$$\boxed{24} : \boxed{8} = \boxed{3} \quad \boxed{24} : \boxed{3} = \boxed{8}$$

2. Izračunaj.

$$467 - 248 = 219$$

$$235 + 159 = 394$$

$$948 - 456 = 492$$

$$555 + 345 = 900$$

$$964 - 369 = 595$$

$$125 + 745 = 870$$

$$874 - 632 = 242$$

$$456 + 324 = 780$$

3. Dijeli s ostatkom!

$$47 : 6 = 7, \text{ostanek } 5$$

$$57 : 9 = 6, \text{ostanek } 3$$

$$75 : 10 = 7, \text{ostanek } 5$$

$$19 : 3 = 6, \text{ostanek } 1$$

4. Imaš brojeve 789 i 456. Izračunaj razliku! Koliko dobiješ?

$$R: 789 - 456 = 333$$

O: Dobijem 333.
