RIJEŠENJE

Zadatak 1:

Izračunaj: $(2/3) / (4/5)$

Rješenje:

$$(2/3) / (4/5) = (2/3) * (5/4) = 10/12 = 5/6$$

Dakle, $(2/3) / (4/5) = 5/6$

Zadatak 2:

Izračunaj: $(5/8) / (3/4)$

Rješenje:

$$(5/8) / (3/4) = (5/8) * (4/3) = 20/24 = 5/6$$

Dakle, $(5/8) / (3/4) = 5/6$

Zadatak 3:

Izračunaj: $(1/2) / (2/3)$

Rješenje:

$$(1/2) / (2/3) = (1/2) * (3/2) = 3/4$$

Dakle, $(1/2) / (2/3) = 3/4$

Zadatak 4:

Izračunaj: $(3/4) / (4/5)$

Rješenje:

$$(3/4) / (4/5) = (3/4) * (5/4) = 15/16$$

Dakle, $(3/4) / (4/5) = 15/16$
